PROFILE SUMMARY

Results-driven **Data Analyst** with 1.5+ years of experience in SQL, Power BI, and Python, specializing in **Supply Chain & E-commerce Analytics**. Expertise in building automated ETL pipelines and production feasibility models. Proven track record of delivering 25–40% efficiency gains through data-driven decisions in warehouse operations and inventory management.

PROFESSIONAL EXPERIENCE

Merlin Brands

July 2025 – Present

Data Analyst (Full-Time)

Faridabad, HR

- **Engineered** a Python-based Production Feasibility model using BOM logic to calculate FG units, reducing manual planning errors by 30%.
- **Spearheaded** the development of Power BI dashboards (DAX, Star-schema), reducing manual reporting time by 40% (from 15 hours to 9 hours weekly).
- **Optimized** WMS operations using Pyrops for inventory tracking, improving warehouse utilization and stock reconciliation accuracy.
- **Automated** multi-source weekly reports using PostgreSQL (CTEs, Window Functions) and Python (Pandas), increasing turnaround speed by 30%.
- **Collaborated** with Marketing to sync distribution with campaign spend, driving measurable ROI in product placement.

Cognifyz Technologies

Nov 2024 – Jan 2025

Data Analyst Intern

Remote

- **Executed** Exploratory Data Analysis (EDA) on 10,000+ restaurant records to pinpoint pricing and channel trends.
- **Developed** rating driver models using Regression analysis, improving predictive accuracy for customer satisfaction by 20%.
- **Recognized** as Top Intern for delivering high-impact visualizations that guided city-level service prioritization.

KEY PROJECTS

Warehouse & Inventory Optimization | *Python, SQL, ABC Analysis*

- Redesigned layout via ABC and Market Basket Analysis; reduced picking time by 60% by relocating high-affinity product pairs.

Fake News Detection | *ML, NLP, Scikit-learn*

- Built a text classification pipeline using Logistic Regression and SVM; achieved 92% accuracy in detecting misinformation.

SKILLS

Analytics: SQL (PostgreSQL, CTEs, Window Functions), Python (Pandas, NumPy, Matplotlib, Seaborn), ETL

Tools: Power BI (DAX, Power Query), Tableau, Excel (Pivot, XLOOKUP), WMS (Pyrops), Git, Power Automate

Techniques: Star/Snowflake Schema, Regression, Clustering, Forecasting, BOM Analysis, Production Modeling

EDUCATION

Doon Business School

Dehradun, UK

PGDM – Data Analytics (Major) — Marketing (Minor)

2023 – 2025

Barkatullah Vishwavidyalaya

Bhopal, MP

Bachelor of Science (Biotechnology)

2019 – 2022

ACHIEVEMENTS & CERTIFICATIONS

- **Certifications:** Google Data Analytics Professional — Power BI Essential Training — Python for ML Bootcamp.
- **Project Delivery:** Maintained a 95%+ on-time completion rate across all professional and project-based roles.
